Get In, Get Out, Together

## ESCAPE-CHAIR® CF Manual downward evac chair with additional safety features

Designed especially for persons of reduced mobility and for wheelchair users. The armrests give the occupant a feeling of safety during the event of an emergency evacuation and can be used to help with transfer from a wheelchair into the Escape-Chair®.

The footrest gives support and improves blood circulation if the evacuee must remain in the Escape-Chair® for a considerable time (in the refuge area or at the assembly point). We highly recommend a footrest option for a rescue from a building with 5 floors or more.

The double ergonomic back support and anti-slide seating brings more comfort and stability for the evacuee. This model has a 2-height adjustable operating handle, which enables operation of this Escape-Chair® for people varying in height.

These evac chairs are ideal for fire evacuation or to transfer patients down staircases. It folds up easily, and can be stored away neatly against a wall, or in a cabinet. A simple, secure, and easy to use product.

- Maximum carrying capacity: 185 kg
- Maximum angle of stairs: 40°.

Get In, Get Out, Together

## Applications

- Any situation that requires moving a person with reduced mobility downstairs
- Fire evacuation

## Why choose the ESCAPE-CHAIR® CF

- Light weight, easy to operate
- Ready for use within a few seconds
- Unfolding stand with wide wheelbase for horizontal transport
- Anti-slip on operating handle and lower bracket
- 2 height adjustable operating handle
- Comfort seat
- Padded (upholstered) headrest.

## About us

Evaccess provide the most comprehensive range of evacuation chairs and stairclimbers to improve safety when getting people in and out of buildings. Important - people have different needs and therefore require different choices.

Evaccess have formed a partnership with Escape Mobility Company Ltd, since 2019. We are a UK distributor and we work on their behalf to complete service and training jobs across the whole of the UK and Ireland. Evaccess are also responsible for completing Site Survey's for Escape Mobility, who are based in the Netherlands, but work with many other countries internationally.
