

## LG EVACU PLUS EL Powered Stairclimber

**Foldable powered stairclimber for use on straight stairs, ideal for transferring people with reduced mobility (PRM)**

The LG EVACU PLUS EL is a powered stairclimber primarily designed for the Ambulance Service for patient transfer. Although the unit works in many different areas, the fact that it is the lightest in its field, means it can be used by 1 – 4 people, it also makes it suitable for all sorts of stairs both up and down.

### Applications

- Airport buses and ambulances
- Can be used in all public areas for example, airports, sports stadiums. All buildings with straight stairs and handle system for curved and spiral stairs
- Basement evacuation.

### Why choose the LG EVACU PLUS EL?

- Lightest in its field reduces manual handling for staff
- Powered stairclimber that goes up and down straight stairs
- Lithium rechargeable battery
- Quick release wall fixing
- Compact and folds up when not in use
- Lighting system for operation in dark areas
- Single person operation

- Speed selection mode
- Maximum speed 45 steps per minute
- Optional passenger fixing system.

### About us

Evaccess provide the most comprehensive range of evacuation chairs and stairclimbers to improve safety when getting people in and out of buildings. Important - people have different needs and therefore require different choices.
